Three views from one location reference

Anchor / change / reject audit | November 7, 2026 | Source images from our production run

1. Steps

Keep: grey office, wet stone, low camera.

Change: invented steps and glass doorway.

Reject: unclear landing or implausible ground contact.

2. Kerb

Keep: billboard profile and grey crowd.

Change: new stone edge and closer character.

Reject: anchors stop reading as one visual setting.

3. Bubble

Keep: screen wall, billboard and bus.

Change: side-view request and tiny pink bubble.

Reject: bubble or body overwhelms location cues.

Geometry: linked designs, not a surveyed map. Use Previs or real photography for exact distances.

Orbit rejection: background slides while Poppie remains frontal; side/back/front route is missing.

Check ground contact, screen design and character scale before buying another motion test.
